

Team America

4/5/11

Leader: Michael McSorley

Minutes: Billy Parker

Minutes for 4/5/2011

- MOSFET board has been submitted and will be out to the board house before the end of the week.
- Microcontroller board is in the design process. All aspects have been planned but schematic needs to be completed.
- Need to order new LCD
 - 4 lines, 20 characters would be desirable for display in the cab of truck
- LCD screen is probably lying around, visit Dr. Schafer's office to get one
- Current sensors are working
 - Need to get better connectors, and check where to lay out the sensors on the actual truck
- GPS is only significant and necessary portion of the project left.
