

Crystal Breath

Meeting #9: Splitting up tasks

3/21/2013

12:30 PM – 1:30 PM

Meeting called by: Crystal Breath

Attendees: Nicholas Castro, Suong Do, Joe Duffy, Joe Levri, John Mullaney

Agenda/Meeting Leader: Joe Duffy

Minutes: Joe Levri

<u>Time:</u>	<u>Question/Task:</u> How are we splitting up the work?	<u>Location:</u>
12:30	<p>Status: It seems as if there are at least two major parts, one of them being the programming of the DSP chip, and the other would be to continue working on the hardware (testing the newer microphones and getting the best readable signal).</p> <p>-We've already done the soldering with the original MEMs microphones, so only two people (at most) would be needed to work on the hardware.</p> <p>-The remaining members should start focusing on the programming aspect, especially since we are not all that experienced at programming in C.</p> <p>-I think that a task to start building towards would be to at least be able to store an audio file to the DSP chip, and see if we can do any DSP with it.</p> <p><u>Action Item:</u></p> <ul style="list-style-type: none">- Test the new mic's- Start playing around with MPLAB and see if we can get a better grasp of how to effectively use the DSP chip. <p><u>Recap of meeting with Dr. Skupski (Completed on March 20)</u></p> <p>-Take a few minutes to recap our meeting with Dr. Skupski with group members not in attendance and Dr. Schafer.</p>	Stinson Remick
