

Lightning Riders
Team Meeting Minutes 1/31/07
By: Stephen Govea

1. Batteries

-- John Sember is working to develop a CAD model for the motorcycle so we can determine the batteries that will fit.

2. Battery Charger

-- Brian is investigating using a thyristor chip based design instead of the buck controller we originally designed.

3. Mechanical

-- Greg Brown at Northern Electric has offered to work on the motor as a donation. Sember has discussed the mount plate and physical connection with the technician who will actually machine our parts.

-- We should send them a thank you for their efforts.

-- There is a mig welder in the art department that we may be able to use.

4. Software

-- Progress being made by John Mrugala and Steve.

5. Website

-- Vince is taking over maintenance of the website.
