

Agenda for Team HEV Weekly Meeting 03/22/2010

Action Items—Worked

- A. Modified Code to display real data values on LCD display
 - Not completed yet
- B. Fixed problem with generator
 - Can demo this week
- C. Determined which SD card interface to purchase for GPS system
- D. Acquired key documents for the software portion of the interface
- E. Began working on circuit designs for our 5 separate circuit boards
 - a. 0805 packages for all resistors and capacitors
 - b. Separate boards for temperature and current sensors
 - i. 5 V om/amp
 - ii. 3 pin input from sensor
 - iii. 3 pin output to microcontroller

Action Items—Open

- A. Finish microcontroller code
- B. Begin writing up code to deal with SD card and GPS interface
- C. Demo circuits with generator
 - Find time to meet
- D. Continue Research on glow-plug specific temperature sensors
- E. Finish microcontroller circuit design and board design
 - a. Ask Questions here
- F. New meeting time?
