Memorandum

To: R.M. Schafer

From: Smart Windows

Date: February 11, 2010

Subject: Meeting Five Minutes

1.) Status Updates
   a. Light Sensors: Kelley
      i. Still working on the A/D converter. By the end of next week, I want to have the light sensor hooked up and send a voltage to the microcontroller, have the microcontroller convert the signal to digital, and send that digital signal to the other board via the Zigbee daughter cards and SPI.

   b. Wireless and Microcontrollers: David
      i. Working with the microcontroller on extended mode and auto acknowledge
      ii. Windows are now self assigning
      iii. Still working on system for when a window leaves the network
      iv. Working with Andy on PC side of things
      v. Working on an addressing scheme
   c. Motors: Tommy
      i. Mounting motors to venetian blinds
      ii. Obtain 1N4004 diodes from Prof Schafer or order 1N5818 diodes
      iii. Bread board an H-bridge
   d. PC software: Andy
      i. Work on PC-Window software
