

Team America

3/29/2011

Leader: Bill Hazel

Minutes: Michael McSorley

Minutes for Meeting #9

- Can read GPS on the terminal for debugging
- Trying to send data to the GPS for initialization
- GPS requires strings of data, so the next step is trying to write strings to the GPS using the program
- Clean up generator code
- It would be best to think of a state machine while programming
- The current sensor circuit has been determined
- Working on the microcontroller main board is a work in progress
