

I. Microcontroller selection

- a. Limited External Interrupts
 - a. Microcontroller with 30+ external interrupts?
 - b. 2 microcontrollers?
- b. DAC
 - a. Internal or external?
 - b. Output centered on zero?

II. Subsystems for Demonstration in 1st Design Review

- a. Subsystems that can be worked on now
- b. Subsystems that need more input from other subsystems

III. Other Issues

- a. Output power of amplifier
