

Notes:

- AFE and RSL10 are now talking to each other
 - The calls provided by On-semis did not suit our needs
 - Is set up ready for pulse ox
 - Will be going with the low level
 - Check to make sure does not interfere with BLE
 - Find out how is reported out
- Now able to move forward with custom protocol and MATLAB post processing
- The boards have been constructed with PD and LEDs
- The final board is in fab and should be ready soon
