

Senior Design Meeting Agenda — Microgrid Team

10:00AM Thursday, March 25th, 2021

205 Stinson Remick

Meeting Leader: *Sylvia*

Secretary: *Brian*

Design Review 2

1. Design pivots

- Instead of using AC to distribute, we are keeping everything DC.
- Instead of using LoRa, we are using UART.

2. Walk through Design Review 2 document

- Each team member will walk through their subsystem setup and testing process and then show a video of their working subsystem.
- The preliminary board design will be presented and explained.

3. Next steps

- Looking forward to Design Review 3, we will work on connecting the subsystems and finalizing our board.
