

Senior Design Meeting Agenda — Microgrid Team

10:00AM Thursday, May 6th, 2021

205 Stinson Remick

Meeting Leader: *Brian*

Secretary: *Dan*

Updates

- Generation Voltage Switching: Previously planned to switch based on power readings but because of variable power readings, now are switching off of generation voltage values. Expected values of panel voltages allow us to make inferences on switching
- Connected Local storage battery pack
- Updated website: updated team bios and pictures → Brian was forced to change his photo
- Connected Earth Ground

Pre-Final Demo

- [Design Requirements](#)

Questions

- What are the poster requirements?
- Earth Ground?
