Meeting 6 Agenda
AggData

Authors: Leo Fangmeyer, Peter Harkins, Ricky Pantin, Michael Pitz
Mentor: Professor Schafer
Agenda for 02/25 Meeting

Questions for Professor:
●

Accomplished this past week:

This week was a light work week, primarily because we finished a lot last week and are waiting on parts and boards to arrive. This week, we focused on software, including some HTML research, and some more work with LoRa communication.

To do:

Software:
● Begin working on "settings" for the project
● Software layout / high level design of software

Hardware:
● Ensure everything works on the board
● Upload software using the Arduino IDE
● Connect sensors and try running code developed so far

Action Items:
● Software HLD
● Put together board
    ○ Test with other LoRa devices to make sure it works
    ○ If it does, build other boards
