

Questions for Professor:

- Our board does not get powered when trying to use a battery, but it works as planned when using a bench supply. We would like to see if Prof. Schafer has any ideas about what could be going wrong.

Accomplished this Week:

- This week the team successfully completed the individual subsystems of the project, as well as some integration.
- We are ready to demonstrate these subsystems to Prof. Schafer for Design Review 2 at this week's meeting.

To do:

- Demonstrate subsystems to Prof. Schafer
- Figure out battery power supply issue
- Upload further documents to team website
- Start to integrate the project's subsystems
- Develop UI plan for server

Action Items:

- Final board design
- Exterior casing research/design
