

## Minutes 2/28

- Subsystem Demonstrations
  - Temperature sensors
    - Demonstration was successful
    - Make sure to calibrate the sensors
  - Wi-Fi interface
    - Maybe alert the server once a day to inform students that their sensor is alive and working
    - Need to test if a signal can be sent through metal box
- Board Design
  - Mounting mechanism
    - We could use magnets
    - We could also use adhesive (velcro)
- Ordering Parts
  - We can either send order information to Professor Schafer
  - We can order them ourselves
  - Spreadsheet on canvas for ordering parts
