

Kyle (leading)
Rayna (scribing)

Demo:

- Demonstrated receiving and transmitting, power
- Have our final board
 - Still need to mount but just got all of the parts
 - Put into program mode w/ reset & boot
 - Build by end of this week
 - Schedule time w/ Schafer in EIH
 - Standard stock parts on neoden
 - Manual pick and place for rest
 - How do we schedule?
 - Friday. Send him an email. 9:30 lecture
 - One rookie error w/ spacing by speaker subsystem

Problems:

- 4.1V boost converter issue
 - Inductor used from datasheet? Yes? - Check for missed enable pin
 - We're good. Probably the soldering
 - May not have this problem on the board
 - Enough head room?
- Button
 - Allowed 😊
 - Go by schaffer's office first - red and white, surface mount
- Posterboard tips?
 - Demo day = poster session
 - What do we want to emphasize? Anything cool?
 - At least one gun should be open so they can see the board
 - So three guns?
 - Could also just screw and unscrew gun

For us:

- Be ready
- Remind him to turn on oven
- Celtic woman if you like voice stuff
