

#### Notes from Update meeting

- 3.3 volt regulators to transistors?
- Cant figure out how to boost until we know how much current we need ???
- Button bounce: Software control necessity
- SPIFS file system to upload that to ESP32 (one way of storing sound)
- Use the module. Sorta 3rd option: PCB trace antenna. Modules with ufl external connector has better performance.
- Pick a connector (connector kits for JST sizes) (SH, PH, ETC) handy to have the battery plug in somehow
- WEBSITE
- Mount speaker were it is convenient to you. Will the speaker do what you want it to do, Extra connections is a no :) (Except Laser, is fine)
- TX?RX Serial interface? NO. Is the Bluetooth transmitting
